

MegaWatt Lasers Laser Rods

These laser rods are of the highest quality standard available. They come standard with high damage threshold coatings and premium wavefront distortion specifications. These are used in our laser resonators and can be purchased as replacements for these resonators. All are made 100% in the USA and are usually in-stock. Custom sizes are available upon request.

Stock rods: (see www.megawattlasers.com for more detailed specifications)

Material	Size	Wavelength	End configuration	Part #
Er:YAG	4 X 101.6 mm	2940 nm	Flat/Flat orthogonal	C760
CTH:YAG	4 X 127 mm	2080 nm	40 cm Concave	C842
CTH:YAG	4 X 127 mm	2080 nm	60 cm Concave	C582
Nd:YAG	6.35 X 152 mm	1064 nm	1.2°// tilts, F/F	C540
